Continuing the tradition of this series of symposia, ISCC'2002 will provide an international technical forum for experts from industry and academia to exchange ideas and present results of ongoing research in the areas listed below. This year, special focus will be on the challenging issues related to the creation, management, dissemination, and communication of information. You are invited to submit a full paper, or a proposal for a panel, invited session, or tutorial, related to the following topics:

Access Networks
Agent Technology
Cable Telephony and Broadband Services
Control and Optimization of Communication Systems
Data Mining and Knowledge Discovery and Applications
Distributed Systems Architecture and Management
Electronic Commerce
High Performance Networking and Protocols
Internet Services and Applications
Management of Information Technology
Mobile Ad-hoc Networks
Multimedia Information Management and Exchange
Network Design, Operation and Management
Network Reliability and Quality of Service
Programmable and Active Networks
Security, Privacy and Information Access
Signal Processing in Communications and Networking
Software Testing and Reliability
Web-based Systems and Network Management
Wireless, Cellular and Mobile Communications

Papers should describe original work, and be 20 double-spaced pages (5,000 words) or less in length. A concise and representative abstract should be included. The paper should clearly indicate the complete postal and electronic mailing addresses, as well as the phone and fax numbers of the corresponding author. Paper submissions must be made electronically via the web, in either postscript or PDF format. Hardcopy or e-mailed submissions will not be accepted. To submit a paper, please follow the submission guidelines at <http://iscc02.deis.unibo.it>.
