

# CADENUS

## Creation and Deployment of End-User Services in Premium IP Networks

# **CADENUS Demonstration**

**The registration, presentation, selection and delivery of a VoD service using the CADENUS Architecture over a DiffServ network („Trial 1“)**

# CADENUS Architecture

# Outline of the Demonstration

To show how the CADENUS architecture provides support for:

- ↓ Independence of service provision and network provision
  - ↓ VOD
  - ↓ VoIP
  - ↓ VPN
  
- ↓ Capabilities for monitoring

Live interaction with our real remote Service Mediator (VoD)

Summary of tests that we will perform on this testbed
